SUMMARY

I am an **MCA graduate** and aspiring Full Stack Developer with strong skills in Core **Java, Python, JavaScript**, and modern web technologies. I have hands-on experience building scalable applications using **React.js, Node.js, Express.js, MongoDB**, and PostgreSQL. My internships and projects strengthened my abilities in API development, testing, and Agile-based teamwork. I am known for problem-solving, adaptability, and delivering efficient, user-focused software solutions.

EDUCATION

- **Master of Computer Applications |** ST Joseph Engineering College Mangalore. [**CGPA: 9.00 |** *Dec 2023- Sep 2025*]
- **Bachelor of Computer Applications |** Sharada College, Talapady, Mangalore. [**CGPA: 8.93 |** *Aug 2020- Aug 2023*]

Experience

▪ **Software Developer – One Planet Technologies LLP** **January 2026 – Present**

- Working on Neargo360, a full-stack e-commerce and marketplace platform using Next.js, React.js, Node.js, Express.js, and MongoDB.
- Developing scalable end-to-end features including multi-store cart workflows, dynamic product galleries, and checkout systems.
- Implemented Cloudinary-based media handling and WhatsApp inquiry integration for vendor communication.
- Improved performance and fixed complex full-stack issues related to cart state management and UI responsiveness.

TECHNICAL PROFICIENCIES

- **Languages: Python**, Core Java, JavaScript (ES6+), C#, TypeScript
- **Frameworks:** HTML5, CSS3, React.js, Node.js, Express.js, ASP.NET, Next.js
- **Databases & Platforms: MongoDB, MySQL**, PostgreSQL
- **AI/ML & Data Skills:** NumPy, Pandas, Matplotlib, Data Preprocessing, Model Training & Evaluation
- **Tools & Development Practices:** Docker, CI/CD, GitHub, Postman, AWS, Cursor (GenAI), SDLC, Agile & Scrum, MVC
- **Office & Productivity: Microsoft Word, Excel, PowerPoint** – for documentation, reporting, and presentation
- **Soft Skills:** Problem-Solving, **Team Collaboration**, **Adaptability, Leadership**, Communication, Time Management

PROJECTS

▪ **Full Stack Inventory Application |** ***Fast API, React.js, PostgreSQL, SQL Alchemy***

Developed a full-stack inventory management system with Fast API backend and React frontend. Implemented CRUD APIs, PostgreSQL persistence (SQL Alchemy), filtering/sorting UI, and Open API docs.

▪ **Question Paper Generation System (QPGS) |** ***React.js, Node.js, Express.js, MongoDB, REST APIs***

Built a dynamic tool for institutions to generate question papers aligned with COs/POs and Bloom's Taxonomy. Implemented role-based access, question management, pattern creation, and PDF/Word export.

▪ **Ayush – Cross-Platform Mobile App |** ***React Native, Node.js, Express.js, TypeScript, MongoDB, REST APIs***

Created a mobile app integrating Ayurvedic product sales with pooja booking. Implemented customer/admin modules, JWT authentication, calendar scheduling.

▪ **Drug Rial – E-Commerce Platform |** ***HTML, PHP, Bootstrap, JavaScript, MySQL***

Developed an online medical products store with secure product management and ordering flow. Applied modular coding, database optimization, and responsive design practices.

▪ **Unique Solution – Service Booking Website |** ***HTML, CSS, JavaScript, PHP, MySQL***

Designed a responsive service booking site for laptops, inverters, and CCTV systems. Implemented form validation, database-driven booking system, and cross-device accessibility.
